# DIGITAL LITERACY

Every student is unique, with different needs and interests. Teachers use the curriculum to plan in ways that respond to those needs and interests. The Australian Curriculum is flexible, allowing schools and teachers to personalise student learning

Digital literacy is a term that means your children understand and have the skills to access, be safe, question, critically analyse, evaluate and create.

Children interact with the digital world every day and with the Australian Curriculum general capabilities and digital technologies curriculum, your children will be learning to be effective and safe users of ICT and confident creators of digital solutions.

Parent fact sheets from ACARA on what children will be learning K-10 with the Australian Curriculum:

- Foundation year
- Year 1-2
- Years 3-4
- Years 5-6
- Years 7-8
- Years 9-10

Tips on helping your child:

- Encourage your child to question and explore new ways of creating things with technology
- Encourage your child to show you what they have learned and created
- Explore different products and technologies together
- Model good online use and discuss tech family rules
- Talk about online safety and how to keep safe online
- Show encouragement
- Learn more about what they are learning at school – ask your child's teacher about ICt plans and what your child will be doing and suggestions on how you can encourage the learning
